

HOW TO OPERATE YOUR

THERMOWOOD® SHUTTERS

Use the tilt rod (if fitted) to open and close the louvres, alternatively open and close the louvres with your hand.

If you have a bi-fold configuration, fold the shutters from side closest to wall and gather stacking this way, with the louvres in a closed position. Never attempt to force the bi-fold action.

In order to correctly close the louvres, stroke the palm of your hand from bottom to top over louvres until closed.

Frequently clear obstructions and dirt from the bottom track using a vacuum cleaner, to make sure the track remains clean, allowing the shutters to move along them smoothly.

HOW TO CLEAN

HOW TO CLEAN YOUR THERMOWOOD® SHUTTERS

Dust frequently with a soft cloth or brush.

Water can be used to clean the shutters.

Do not use any chemical solutions on this product.

Our Thermowood® Shutters carry a warranty up to 3 years from date of purchase against faulty workmanship or components as well as faulty installations. Terms and conditions apply.
